### **Beachcomber Stick Chair**

In the 18th century a profound design movement took place in Wales. It was led by peasant carpenters who, simply in an effort to create a practical seating option, produced one of the most elegant, modern chairs of that time. It is known as the 'Welsh Stick Chair' and it's makers are thought to be the forefathers of the Shakers. We are so compelled by the form that we decided to design our own California variation.
